1. EXECUTIVE SUMMARY

The Flinders Ranges Council is a local government area (LGA) located in the Flinders Ranges of South Australia. The LGA is approximately 100 km from north to south, and 45 km from east to west, with a total area of 4,198 square kilometres.

The Flinders Ranges Council services the townships of Quorn, Hawker and Cradock. It is bounded by the District Council of Mount Remarkable to the south, The District Council of Orroroo Carrieton in the south east, Port Augusta Council City in the west and Outback Communities Authority in the north.

The Council area is located approximately 350kms to the north of Adelaide, and close to the southern end of the Flinders Ranges. The three townships are in the heart of the Flinders Ranges.

The town is strategically located to key tourism areas of regional SA, The Flinders Ranges Council area provides major road access from the western and eastern States to the Flinders Ranges, and further north.

DOG AND CAT OWNERSHIP

Council is committed to fostering an environment in which the community can continue to harness the benefits of pet ownership. In this environment, it is essential that Council takes a strategic approach to managing domestic pets, allowing it to plan for and address the needs of the community over the next five years.

VISION AND MISSION

Council wishes to maintain a balance between competing interests in the community. To address domestic animal management whilst promoting responsible ownership of dogs and cats, animal welfare, and the benefits of animal companionship, focusing on the legitimate needs of pets and their owners whilst respecting the rights of other members of the community and protecting the environment.

LEGISLATIVE REQUIREMENTS FOR THE PLAN OF MANAGEMENT RELATING TO DOGS AND CATS

(Section 26A of the Dog and Cat Management Act 1995)

The *Dog and Cat Management Act 1995* (the Act) provides the framework for the management of dogs and cats in the community. Its purpose is to:

- Encourage responsible dog and cat ownership;
- Reduce public and environmental nuisance caused by dogs and cats; and
- Promote the effective management of dogs and cats.

Council is responsible for implementation of the Act within the Council area, in accordance with Section 26A of the Act. Council is required to prepare a management plan relating to dogs and cats within their local area and review and update this plan every five (5) years.

Section 26A – Plans of management relating to dogs and cats, states:

- Each Council must, in accordance with this section, prepare a plan relating to the management of dogs and cats within its area.
- A plan of management must include provisions for parks where dogs may be exercised. Off leash and for parks where dogs must be under effective control by means of physical restraint and may include provisions for parks where dogs are prohibited.
- A plan of management must cover 5-year periods and each plan must be prepared and presented to the Board at least 6 months before it is to take effect.
- A plan of management must be approved by the Board before it takes effect.
- Council may, with the approval of the Board, amend plan of management at any time during the course of the 5-year period covered by the plan.

2. BACKGROUND

This Animal Management Plan has been prepared by The Flinders Ranges Council in consideration of its responsibilities under the Act and will guide domestic animal management by the Council over the next five (5) years (2022 – 2027).

The Council conducted a community consultation survey in the two previous Plans, calling for the opinions and suggestions of residents and other stakeholders in regards to the previous Animal Management Plan. Priorities moving forward include cat registration, confinement and impact of unidentified and unowned cats in the district, along with other relevant issues. This source of information has been invaluable in the Plan's creation.

The Plan identifies strategies and actions to implement the mission, aims and objectives for domestic animal management, which relates back to the wider policy context. The Plan has been prepared by Council, who consulted with the public and the Dog and Cat Management Board on the draft prior to its adoption by Council.

The Plan outlines a wide range of actions to be undertaken by the Council.

This new plan provides Council with the opportunity to address animal management at a strategic level and implement initiatives to address the legislative changes to the Act. The legislative requirements under the Dog and Cat Management Act 1995 are:

- Registration - all dogs and cats are to be registered on the Dog and Cat online portal.
- Microchipping – all dogs and cats over three months of age to be microchipped;
- De-sexing –the requirement that all new generations of dogs and cats born after 1 July 2018 are to be de-sexed by six months of age
- Breeders – the requirement for anyone who breeds dogs and cats for sale to register as a breeder with the Dog and Cat Management Board.
- Sellers –the requirement for certain information to be provided to the buyer.
- Council Powers – Councils have greater powers to administer and enforce the Act including increases in some expiations and penalties
- Assistance Dogs – changes to who can accredit animals.

CURRENT STATISTICS AND FIGURES AT A GLANCE:

DOGS:

	2018-2019	2019-2020	2020-2021
REGISTRATION			
Number registered	486	448	471
IMPOUNDING			
Number impounded	4	3	0
Number returned to owner	10	0	5
INVESTIGATIONS			
Barking Dogs	8	1	10
Wandering at large	17	6	1
Attacks on humans	0	2	1
Attacks on animals	3	4	0
Expiations	3	10	4

CATS:

	2018-2019	2019-2020	2020-2021
REGISTRATION			
Number registered	48	57	66
COMPLAINTS			
Number received	16	7	34

3. THE LAW / GUIDELINES

Requirement	Legislative Instrument
Mandatory desexing of dogs and cats born after 1 July 2018	Dog and Cat Management Act
Mandatory microchipping of all cats and dogs	Dog and Cat Management Act
Registration of all dogs	Dog and Cat Management Act
Registration of all cats	Council's Cats By-law No.6 of 2018
Requirements for breeders who sell cats and dogs	Dog and Cat Management Act
State-wide registration system, Dogs and Cats Online (DACO)	Dog and Cat Management Act
Controls regarding wandering at large - Cats	Council's Cats By-law No.6 of 2018
Exercising dogs in public places including playgrounds and Council land	Council's Dog By-law No.5 of 2018 Dog and Cat Management Act
Limit of 2 dogs/cats per property without permission from Council	Council's By-laws

Council has Authorised Officers, and six (6) delegated additional Dog and Cat Management Officers who are able to enforce all of the Dog and Cat regulations required by Council.

The Authorised Person's primary role in dog and cat management is regulatory through the administration of the Act and relevant Council By-laws. Their subsequent role is to be an advocate for responsible dog and cat management ownership. In addition, they also provide critical business functions by way of reactive request management (picking up wandering dog and cats, investigating dog attacks and barking dog reports) and proactive services (patrolling on-leash and dog prohibited areas, information provider, advocate, promoting the identification and microchipping of dogs and cats).

4. REVENUE

Registration fees for dog and cats are set by Council as prescribed by the *Dog and Cat Management Act 1995*. As of 1 July 2018, Council contributes to the Dog and Cat Management Fund from dog and cat registration fees collected.

The income from collecting dog and cat registration fees are spent on services provided by Council for dog and cat management. Council's Regulatory Services staff provide the following:

- recreational areas for the safe exercise of dogs
- dog faeces disposal bags throughout Council towns
- collection and return of dogs found wandering at large
- investigation of reported dog harassments and attacks
- investigation and mediation of barking dog complaints
- investigation of nuisance cat complaints
- enforcing and administering clauses of By-Law No.5 – Dogs, and By Law No.6 - Cats
- registration of dogs within the area
- registration of cats within the area
- collection and provision of statistics to the Dog and Cat Management Board

5. COUNCIL'S MANAGEMENT OF DOGS and CATS

MANDATORY DOG AND CAT REGISTRATION

Pursuant to the *Dog and Cat Management Act 1995* (the Act) and Council's By-laws, all dogs and cats in the district must be registered on the Dogs and Cats Online system.

Whilst we encourage dog and cat owners to participate with self-registration and the updating of their pet's details on the Dogs and Cats Online system, Council assists the process by making available Customer Services for owners wishing to register or update their pet's details directly with us.

MANDATORY MICROCHIPPING OF DOGS AND CATS

Pursuant to 42A of the Act all dogs and cats must be microchipped.

Council actively promotes microchipping and will continue to arrange (if required) microchipping days to assist dog and cat owners to comply with the legislation.

Council staff have equipment to scan for microchips, so that we can re-unite owners with lost pets as quickly as possible.

The microchip number is the link to the owner's contact details which are held on the state-wide database (Dogs and Cats Online), and owners are requested to review and update details regularly.

DESEXING OF DOGS AND CATS

The Act has mandated the desexing of all dogs and cats born after 1 July 2018, before the age of 6 months, or within 28 days of possession. There are some exemptions to this i.e. registered breeders, working dogs, Dogs SA members, etc.

OFF-LEASH DOG PARK

The Flinders Ranges Council has established two (2) off-leash dog parks in the towns of Quorn and Hawker for residents and visitor alike to utilise.

Both these areas provide a very pleasant environment for dogs and their owners, especially during the summer months.

Items such as bench seats, dog exercise equipment, bag dispensers and drinking points have also been installed for the benefit of the park's users. Both of these Dog Parks will continue to be maintained by Council.

PICKING UP AFTER YOUR DOG

It is an offence to fail to pick up after a dog, as per the Dog and Cat Management Act 1995, Part 5, Section 45A (6). Council has installed many dog waste bag dispensers which encourages responsible pet ownership through the removal of dog faeces from public places. These dispensers are located across the Council area; within parks and reserves for the benefit of dog owners and our community in keeping our district a comfortable and pleasant place to enjoy. These Dispensers are checked regularly and are how housing biodegradable and environment friendly bags.

LOST ANIMALS

Where a dog is identified (ie microchip, registration disc) Council's Officers will make every effort to reunite the animal with their owner. Unidentified dogs will be impounded in accordance with the Dog and Cat Management Act and advertised on social media to locate the owners. Any unclaimed dogs that are suitable as pets will be made eligible for re-homing to persons seeking a pet. Unclaimed dogs, which cannot be re-homed, as a last resort, will be humanely euthanized.

Warnings are issued to first offenders of a minor nature, that is, where no harm to a person or property has occurred, however penalties prescribed by the Act will be applied for re-offenders.

A dog wandering at large can be at risk of injury, a threat to livestock and members of the public, and Council is aware that serious attacks can arise in these circumstances. Council therefore implements procedures to minimise its occurrence in the community.

In accordance with the Act, it is an offence to allow a dog to wander at large. A dog will be taken to be wandering at large if it is in a public place, other than a park, or a private place without the consent of the occupier and no person is exercising effective control by way of a physical restraint. A dog will also be considered to be wandering at large if in a park and no person is either exercising physical restraint or by command, the dog being in close proximity to the person and the person being able to see the dog at all times.

The Council Administration Office is open from 9.00am to 5.00pm Monday to Friday. An after-hours call system is provided by Council, in the event of an emergency.

CAT TRAPS

To support responsible cat management within the community, Council has developed a procedure and hire agreement form in relation to the hiring of cat traps. This will assist Council in reducing the number of unidentified cats and complaints and to address the impact they cause to the community and the environment by providing a cat trap hire service. This policy is available from www.frc.sa.gov.au.

Cat traps can be hired in accordance with The Flinders Ranges Council Cat Trap Procedure, for a fee, from the Council offices to residents for a minimum hire period of five (5) days. A deposit is payable upon collection of the cage which is refunded in full if the cage is returned by the hire return due date in a clean and undamaged condition.

When a cat is caught and retrieved by Council's Authorised Officer, it will be scanned with two (2) different scanners by the Officer, plus there will be an extra observer during this procedure (Council employees only). If the cat can be identified through a microchip or identification tag, the Authorised Officer will contact the owner and arrange for the cat to be collected. The Officer will also endeavor to promote to the owner the importance of responsible pet ownership and of containing the cat within the boundaries of their property. On a case-by-case basis, if a cat is deemed unowned and is without identification, will be taken to the Vets at Port Augusta and if suitable the cat will be rehomed or humanely euthanised.

OUR FACILITIES: Impounded Dogs and Cats

The Flinders Ranges Council has two (2) Animal pounds: one is located in Quorn at the Works Depot and the second one is located at the Hawker Depot. Both have been approved by the Board.

Unclaimed dogs are kept for 72 hours and if not collected by their owner they will (if suited) will be rehomed.

Cats are usually kept for a period 24 hours before they are relocating to the Vets at Port Augusta. Council will assist residents in removing excessive number of unidentified cats from properties within townships.

Any dog and cat held temporarily by Council is regularly monitored by an Animal Management Officer.

UNIDENTIFIED AND UNOWNED CATS

An unidentified cat is a cat that is not microchipped or has no evidence as to who it belongs to. Unidentified and unowned cats pose significant risks to native wildlife through predation in addition to possible disease transmission.

Council regularly receives complaints regarding these cats wandering onto properties, participating in nuisance behavior, including cat-fights, provocation of barking dogs, damage to property including marking of territory, damage to gardens and vehicles, attacking and killing native wildlife and scavenging for food.

They are a nuisance to humans and a health risk to owned domestic cats. They are not vaccinated against diseases and can be responsible for spreading disease to native and domesticated animals.

Members of the community who feed unidentified and unowned cats should either fully adopt the cat, ie register, desex and microchip it, or to hand them in to Council.

6. OBJECTIVES / STRATEGIES / MEASURES (KPI) ACTION PLAN FOR IMPROVED ANIMAL MANAGEMENT

KEY RESULT 1: PROMOTE THE COMMUNITY BENEFITS OF PET OWNERSHIP

- Raise awareness of the benefits of pet ownership to the community.
- Increase awareness of the benefits of well-behaved and socialised dogs in the community.
- Facilitate and encourage re-homing of unowned and impounded animals.
- Provide safe and secure temporary containment facilities for lost and found dogs and cats.
- Ensure promotional material is available and current.

KEY RESULT 2: CREATE A SUSTAINABLE 'PET-FRIENDLY' ENVIRONMENT

- Identify and enforce dog 'on-leash' and 'off-leash' areas to provide appropriate opportunities for exercising dogs.
- Reduce public and environmental nuisance caused by dog faeces.
- Proactively manage unidentified and unowned cat colonies within the local Council area.

KEY RESULT 3: PROVIDE A STRONG REGULATORY FRAMEWORK

- Sustain an appropriate mix of relevant laws, systems and procedures for animal management.
- Promote the requirements for local dog and cat breeders.
- Continuously improve the role, profile and capacity of authorised persons.

KEY RESULT 4: ENCOURAGE GOOD ANIMAL BEHAVIOURS

- Educate residents about mandatory desexing requirements.
- Monitor compliance with the mandatory desexing requirements.
- Reduce the impact of barking dogs in the community.

KEY RESULT 5: ENCOURAGE LIFETIME IDENTIFICATION

- Educate residents about mandatory microchipping requirements.
- Increase number of dogs and cats microchipped within the Council area.

STRATEGIES

Key Result 1: Community Benefits of Pet Ownership

Pets are an integral part of our lives as Australians. About 80% of Australians have an animal companion at some time. Pets are important in children's lives as they provide enjoyment and help children develop responsibilities transferable to adulthood. Sometimes pet relationships are ranked higher than certain kinds of human relationships for comfort, esteem, support and confidence. Some benefits of pet ownership have been identified in areas of child development, family harmony and even health.

OBJECTIVE	ACTION	MEASURE
Raise awareness of the benefits of pet ownership to the community	<ul style="list-style-type: none"> Promote responsible pet ownership, pet selection and breed selection through appropriate media. Implement various campaigns, such as wandering dog and cat campaigns and benefits of identification to highlight various issues relating to responsible pet ownership. 	<ul style="list-style-type: none"> Articles published through social media and/or Council's newsletter The Informer. Reduction in expiations issued. Number and type of campaigns. Reduction in dog and cats wandering at large. Reduction in dogs and cats found not microchipped or desexed.
Increase awareness of the benefits of well-behaved and social dogs in the community	<ul style="list-style-type: none"> Make available publications at the front counter of Council's office. 	<ul style="list-style-type: none"> Favourable feedback from the community. Noticeable reduction in reports of aggressive dog behaviour.
Facilitate and encourage re-homing of unowned and impounded animals	<ul style="list-style-type: none"> Assess animal to ensure they are suitable for re-homing. Advertise via media sources for a new home. 	<ul style="list-style-type: none"> Maximise occurrences of animals being re-homed compared to being euthanized.
Provide safe and secure temporary detention facilities for lost and found dogs and cats	<ul style="list-style-type: none"> Ensure team members are trained, qualified and experienced in their responsibilities by providing ongoing training to authorised persons. Ensure facilities comply with the Dog and Cat Management Board's guidelines for detention. 	<ul style="list-style-type: none"> Number and type of training undertaken. Compliant audits conducted by the Dog and Cat Management Board. Regular maintenance of facilities.
Ensure promotional material is available and current	<ul style="list-style-type: none"> Review and update promotional material regularly to ensure it is accurate. 	<ul style="list-style-type: none"> Number of reviews undertaken.

Key Result 2: Create a Sustainable ‘Pet-friendly’ Environment

Pets are an important part of the family and require ongoing care and nurture.

Owners have many considerations to ensure their pet is well cared for physically and mentally and that they don't develop nuisance behaviours. Both the home and public open spaces should provide opportunities for pets to play, socialise and interact safely and sustainably.

This plan adopts the principles that responsible pet owners can own pets in a variety of housing situations. With proper safeguards, public open space and community land provides a valuable opportunity for people and pets to come together on a larger scale to help build a sense of community.

Whilst promoting responsible pet ownership we also need to manage unidentified and unowned cats. Unidentified and unowned cats live outdoors and have little or no human contact. They resort to killing native wildlife and scavenging for food. They are not vaccinated against diseases and can be responsible for spreading disease to native and domesticated animals.

Members of the community are encouraged to report populations of unidentified and unowned cats to Council for further action. Council also hires out cat traps to the public to assist with managing unidentified and unowned cats. A condition of hire form must be read and signed and a refundable deposit received prior to hiring a cat trap.

OBJECTIVE	ACTION	MEASURE
Identify and enforce dog ‘on-leash’ and ‘off-leash’ areas to provide appropriate opportunities for exercising dogs	<ul style="list-style-type: none"> Patrol dog on-leash, off-leash and prohibited areas, and educate owners on responsibilities. Strategic placement of signs that promote legislative requirements, dog etiquette and owner responsibilities. 	<ul style="list-style-type: none"> Make educational material available to the public from Council’s front counter and on Council’s website on what is effective control of dogs. Number of expiations issued.
Reduce public and environmental nuisance caused by dog faeces	<ul style="list-style-type: none"> Maintain dog bag dispensers in parks and area where people frequently walk dogs. Promote the existence of dog bag dispensers, and the requirement for owners to pick up after their dog. Proactively enforce non-compliance where possible. 	<ul style="list-style-type: none"> Minimal reports or complaints of dog faeces on public space areas. Increase in expiations issued for non-compliance. Ensure dispensers are checked and refilled as necessary, especially during busy holiday periods. Install signage advising it is an offence not to clean up after your dog.
Proactively manage unidentified and unowned cat colonies within the local Council area	<ul style="list-style-type: none"> Facilitate a cat trap hire service to residents in the area. Ensure the public is aware that Council can assist with unidentified cats. Promote and educate the community on cat management issues. 	<ul style="list-style-type: none"> Number of cat traps hired by residents. Number of complaints about unidentified cat complaints received. Number of enforcement actions taken.

Key Result 3: Provide a Strong Regulatory Framework

For people and pets to live well together in a community there needs to be agreed expectations, clear structure, rules and procedures for:

- promoting responsible, community-minded behaviours
- protecting our environment and public health
- encouraging compliance with legislative and policy requirements
- dealing with any nuisance caused by dogs and cats.

The *Dog and Cat Management Act 1995* sets out council's responsibilities for regulating dog and cat management, including the maintenance of a dog register, development of by-laws, appointment of Authorised Officers, enforcement of legislative responsibilities and the issuing of Dog Control Orders.

OBJECTIVE	ACTION	MEASURE
Sustain an appropriate mix of relevant laws, systems and procedures for animal management	<ul style="list-style-type: none"> • Conduct scheduled reviews of policies and standard operating guidelines to reflect legislative changes and best practice. • Contribute to consultation conducted by the Local Government Association, the Dog and Cat Management Board and South Australian Government. 	<ul style="list-style-type: none"> • Up to date policies. • Up to date standard operating guidelines. • Incorporation or consideration of Council's ideas and position in new regulation, legislation, procedures and systems.
Promote the requirements for local dog and cat breeders	<ul style="list-style-type: none"> • Educate the community regarding legislative requirements and responsibilities. 	<ul style="list-style-type: none"> • Work with breeders and sellers to ensure they are compliant with the Act.
Continuously improve the role, profile and capacity of authorised persons	<ul style="list-style-type: none"> • Provide ongoing training and support to authorised persons. Ensure team members are highly trained, qualified and experienced in their responsibilities. 	<ul style="list-style-type: none"> • Minimal number of incidents reported. • Consistent and accurate dissemination of information to the community.

Key Result 4: Encourage Good Animal Behaviours

Responsible pet ownership information is provided on Council’s website, social media, in the newsletter and the daily activities of authorised persons.

Since July 2018, owners have been required to desex their dogs and cats if they were born after 1 July 2018 (these are considered “new generation”). Exemptions are available as prescribed in the *Dog and Cat Management Regulations 2017*. This is important because accidental litters and roaming animals in heat can cause public nuisance, puts owned dogs and cats at risk of injury and adds financial burdens to owners. From a public safety perspective, there is evidence that desexed dogs are less likely to be involved in dog attacks.

There are two fenced off-leash dog parks within the Council area, allowing owners to socialise and exercise their dogs safely. Owners are required to keep their dogs under effective control at all times by leash, or permitted off-leash, provided the dog is kept close and is responsive to verbal commands.

OBJECTIVE	ACTION	MEASURE
Educate residents about mandatory desexing requirements.	<ul style="list-style-type: none"> Promote the new legislative requirements for dogs to be desexed through various communication channels. 	<ul style="list-style-type: none"> 90% of dogs registered after 1 July 2018 are desexed or have the applicable exemption. Work with the dog and cat management board, and or vets and review schemes which assist in reducing costs to the community for desexing.
Monitor compliance with the mandatory desexing requirements	<ul style="list-style-type: none"> Obtain reports from Dogs and Cats Online to identify non-desexed dogs and cats. Contact owners of non-standard animals. 	<ul style="list-style-type: none"> Reduction in the number of non-desexed dogs and cats being impounded. Enforcement is activated for continued non-compliance.
Reduce the impact of barking dogs in the community	<ul style="list-style-type: none"> Provide educational material to dog owners to assist them with changing a dog’s barking behaviour. Make available to the public barking dog material from the Board. Include educational information for the community about why dogs bark and how to address/avoid the issue. 	<ul style="list-style-type: none"> Minimal barking dog complaints. Successful outcomes between neighbours in dispute regarding barking dogs. Provide the community with the resources needed to resolve the complaint without the intervention of Council. Streamline processes to reduce frustration of all parties.

Key Result 5: Encourage Lifetime Identification

Owners of dogs and cats kept in The Flinders Ranges Council area are required to register their animals annually with Dogs and Cats Online.

Annual dog and cat registration is a critical element to dog and cat management in South Australia. It provides statistical information on the dog and cat population and provides funding to assist with the management of dogs and cats in the area. The registration data is also used to quickly reunite owners with found dogs and to assist in investigations relating to nuisance reports and dog attacks.

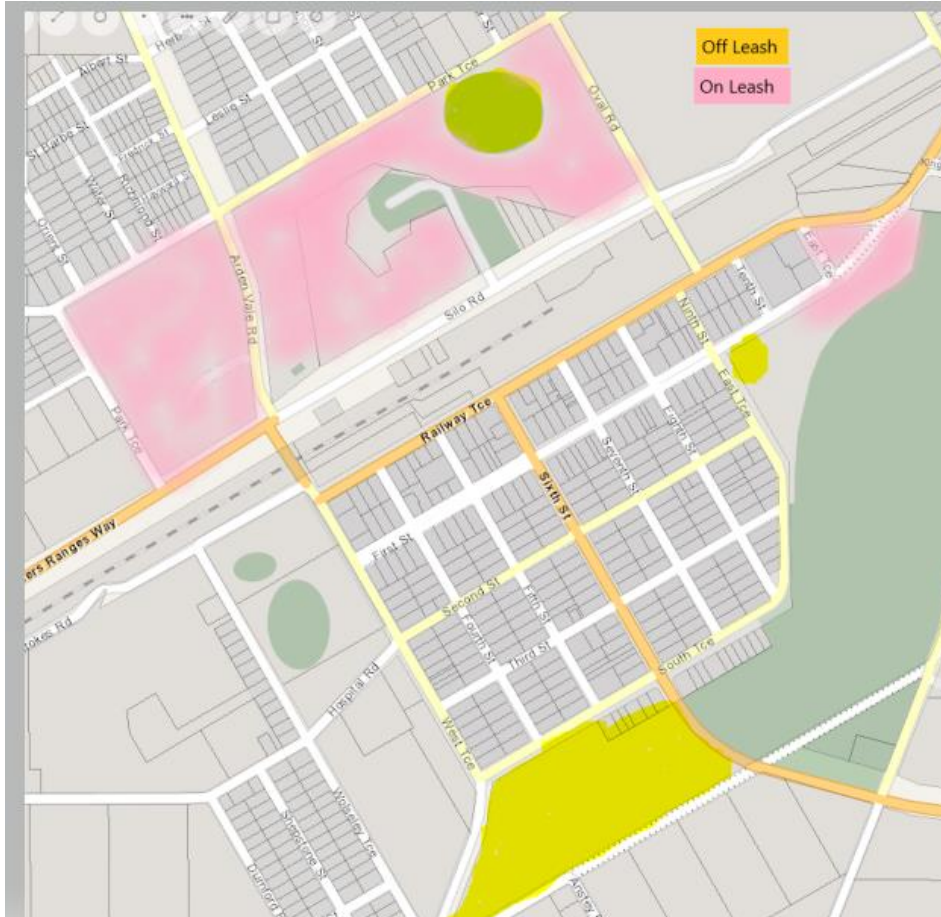

The Dog and Cat management Act and Council's Cat By-Law requires cats to be identified by means of a microchip.

Microchipping also supports Council to return dogs and cats to their owners that become lost, escape or are found injured or should their registration disc or collar have come off. Owners are required to keep the contact details up to date on Dogs and Cats Online. More information on Dogs and Cats Online, can be found on Council's website.

OBJECTIVE	ACTION	MEASURE
Educate residents about mandatory microchipping requirements	<ul style="list-style-type: none"> Information to be posted on Council's website and social media. Support Dog and Cat Management Board by local advertising of Board produced information and website links. 	<ul style="list-style-type: none"> Minimal occurrences of those who claim to have not known the requirements. High rate of registered dogs and cats that are microchipped.
Increase number of dogs and cats microchipped within the Council area.	<ul style="list-style-type: none"> Partner with other organisations for discounted microchipping. Work with local vets and review schemes which assist in reducing costs to the community for microchipping. 	<ul style="list-style-type: none"> Organise and assist in facilitating microchipping days. Number of animals microchipped at organised events. Percentage of microchipped dogs/cats increase over the life of the plan.

7. APPENDIX: MAP OF OFF AND ON LEASH AREAS FOR QUORN AND HAWKER

DOG PROHIBITED AREAS

The Dog and Cat Management Act 1995 prohibits dogs from all South Australian school grounds, kindergartens, child care centres and preschools without prior permission from the person in control of that site.
